# Technical Bulletin

Subject: **Malfunction Indicator Light (MIL) ON, DTC P0421 or P0431 Stored in DTC Memory**

Group: **01**

Number: **03-05**

Model(s): **allroad quattro with 2.7L (Eng. Code APB 2001 and ECM Part No. as listed below)**

Date: **May 5, 2003**

Supersedes T.B. Repair group 01 No. 03-03 dated Apr. 17, 2002 due to incorrect date only

## Condition

ECM requires "Update - Programming" (flashing) to correct:

MIL is ON with Diagnostic Trouble Code (DTC) P0421 "Warm up catalyst, bank 1, efficiency below threshold", or DTC P0431 "Warm up catalyst, bank 2, efficiency below threshold" stored in DTC memory.

The Engine Control Module (ECM) may diagnose the Warm up Catalytic Converter incorrectly under high engine load conditions. The diagnosis threshold has been changed in MY 2002 Engine Control Modules (ECM).

Applies only to 2001 allroad quattro models with ECM Part No: 4Z7 907 551 or Part No: 4Z7 907 551K.

## Service

### **CAUTION!**

***The following "Update - Programming" (flashing) process may overwrite any "TUNED" ECM programming.***

***A "TUNED" ECM is described as any ECM altered so as to perform outside the normal parameters and specifications approved by Audi of America, Inc..***

**Important!**

Please give copies to  
all your Audi Technicians

# Technical Bulletin

---

If you encounter a vehicle with a “Tuned” ECM, prior to performing the “Update - Programming” (flashing) procedure:

- Your Dealership should place the vehicle owner on notice in writing, that their ECM was found to have been tuned, and that any damage caused by the tuning of the ECM (including any adverse emissions consequences) will not be covered by Audi of America, Inc. warranties.
- For any repair requested by the owner under warranty or outside warranty that requires flashing, which will automatically wipe out the “Tuning” program, your Dealership should advise the owner of the above and get his written consent (see attached Control Module Tuning form) to the flashing procedure.

## Tool requirements

- ◆ VAS 5051 or VAS 5052 with Basis CD A.05.15 and the Brand CD A.05.0 (or later).
- ◆ “Update - Programming” (flashing) CD “KM01” (indicated on CD).

Additional copies of “Update - Programming” (flashing) CD (Item no: A0050012588) may be ordered from the Audi Technical Literature Ordering Center at [audi.ddsltd.com](http://audi.ddsltd.com), or by calling 1-800-544-8021 from 8:00 a.m. to 8:00 p.m. EST Monday through Friday. This number can be dialed in both the United States and Canada.

**Important!**

Please give copies to  
all your Audi Technicians

# Technical Bulletin

## Vehicle requirements

- ◆ Battery **MUST** have minimum no-load charge of 12.5V (failure to maintain voltage during update process can lead to ECM failure)
- ◆ VAS 5051: connected to vehicle (using K-lead adapter VAS6017A) and to 110V AC Power supply at all times during procedure
- ◆ VAS 5052: connected to vehicle (using K-lead adapter VAS6017A) with battery voltage requirements met
- ◆ Any appliances with high electromagnetic radiation (i.e. mobile phones) switched OFF.
- ◆ No stored DTCs, print and erase any stored DTCs.

### **CAUTION!**

***Non-observance of the following points may lead to ECM failure!***

***VAS 5051 or 5052 must always be connected to the approved power supply at the approved voltages. Under no circumstances should the power supply be interrupted or the diagnostic connector unplugged during the flash procedure.***

***Any appliances with high electromagnetic radiation (i.e. mobile phones) must be switched OFF.***

# Technical Bulletin

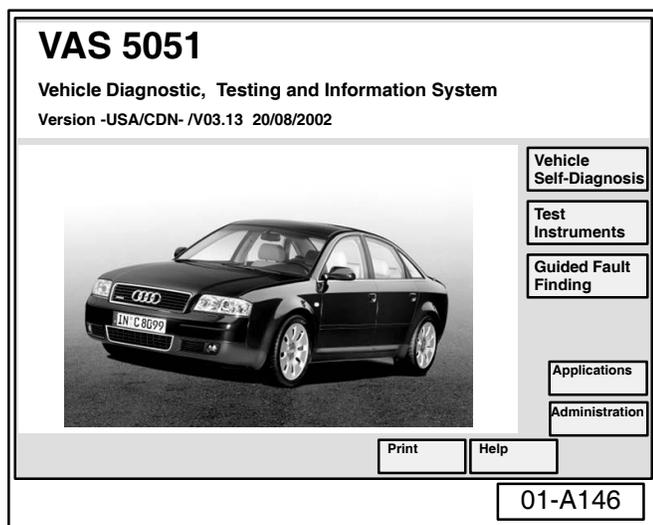

**PRIOR to performing procedure to “Update - Programming” (flash) the ECM:**

- ◆ ALL fault memories must be interrogated and erased.
- Switch ignition ON.
- Select Vehicle “Self Diagnosis mode”.
- Select Diagnosis function 00 “Collection services”.
- Select “Check DTC memory - complete system” which will interrogate all fault memories.
- Print all DTCs.
- Erase ALL fault memories.

Once ALL fault memories have been erased:

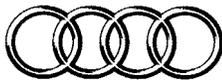

“Update - Programming” CD must be used to place the tester into the flashing mode (see “VAS 5051 / VAS 5052, programming for flashing mode” below).

- Update Programming (reflash) the Engine Control Module (ECM). Do not replace catalytic converter.

**VAS 5051 / VAS 5052, programming for flashing mode**

- Switch ignition ON.
- ◀ – Switch VAS 5051/5052 ON and insert flash CD into CD drive as soon as start screen appears.
- Select “Applications”.

## “Update - Programming” (flashing) procedure, checking for update match

- On the Applications screen, select the ◀ button, to return to start screen.
- Select “Vehicle Self Diagnosis” mode.
- Select vehicle system “01-Engine electronics”.

- Select the “Print”, then “Screen” button.
- Select the ▶ button.

◆ “Update - Programming” (arrow) will appear.

### Note:

*The “Update - Programming” function is only available when the inserted flash CD level and current vehicle ECM level are different.*

- ◀ – Select “Update - Programming” option at bottom of screen (arrow).

Vehicle Self-Diagnosis	01 - Engine electronics
Select diagnosis function	ECM Part Number ECM description & software level Coding XXXXX Dealership number XXXXX
02 - Interrogate fault memory 03 - Final control diagnosis 04 - Basic settings 05 - Erase fault memory 06 - End output 07 - Code control unit 08 - Read data block 09 - Reading individual measuring value 10 - Adaption 11 - Log-in procedure Update - Programming ◀

**Important!**

Please give copies to  
all your Audi Technicians

# Technical Bulletin

- ◀ ◆ Similar screen appears.
- Select "exit".

- VAS 5051 / VAS 5052, returning to normal operation mode**
- ◀ From the VAS 5051/5052 start screen:
- Select "Applications".

- ◀ – Select "Start application of CD ROM" (arrow).

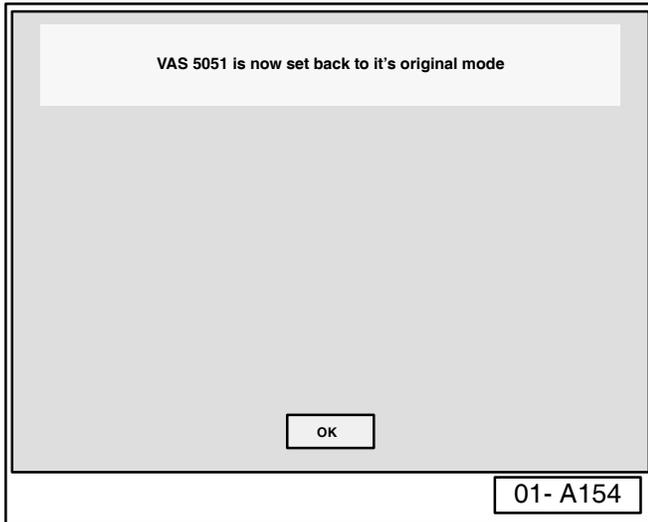

**Audi**

**Important!**

Please give copies to  
all your Audi Technicians

# Technical Bulletin

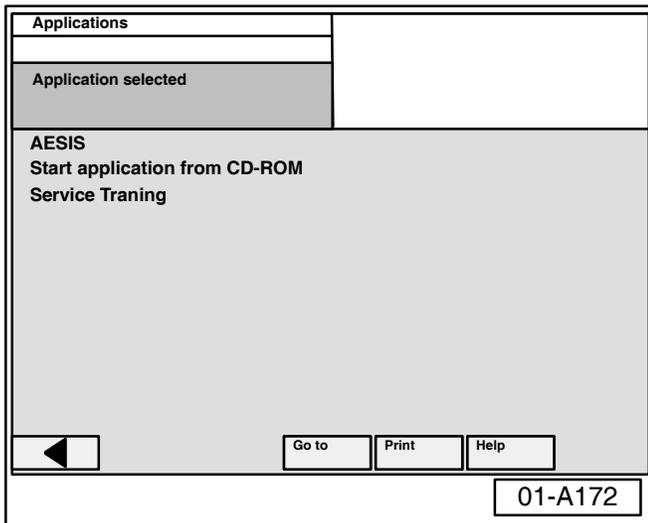

◀ The VAS 5051/VAS 5052 is now set back to its “original mode”.

– Select “OK”.

**Note:**

*If this step is not completed the VAS 5051/VAS 5052 will NOT be capable of performing any diagnostic functions!*

◀ – On the Applications screen, select the ◀ button, to return to start screen.

◆ ECM reprogramming is complete.

**Note:**

*It is not generally necessary to encode the ECM following the “update - Programming” (flashing procedure). However, you must set the readiness code.*

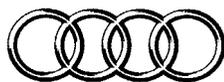

To set readiness code:

- Use VAS 5051 or VAS 5052 and Self Diagnosis, along with the attached Quick Reference “How to set Readiness Code”.

With readiness code set:

- Remove CD and disconnect VAS 5051 / VAS 5052 from vehicle.

For Warranty information see Page 12.
