StopTech Big Brake Kits

- High performance brake upgrades for road or track
- Patented StopTech aerorotors for optimized airflow
- Patented, billet aluminum aerohats to further increase airflow
- Ultra-stiff StopTech calipers with patented bolt-in bridge for reduced compliance
- StopTech stainless steel lines for better pedal feel
- All brackets and hardware to complete the job
- Components made in the USA
- Full ISO/TS 16949:2009 certification

StopTech Big Brake Kits represent the ultimate high performance brake upgrade and give vehicles that supercar look and feel.

Every StopTech Big Brake Kit exceeds stock performance in two key areas: First, larger rotors increase heat capacity, allowing a driver to brake harder stop-after-stop with reduced chance of fade. Second, stiffer calipers and stainless steel lines reduce system compliance, providing consistent pedal feel and confidence-inspiring responsiveness.

StopTech Big Brake Kits feature fully forged calipers with patented stiffening bridges, patented 2-piece AeroRotors for optimized cooling, braided stainless steel brake lines, performance brake pads, mounting brackets and all necessary hardware to complete the installation. StopTech Big Brake Kits were the first Balanced Brake Upgrades on the market, offering optimized brake bias to utilize all the traction available from all four tires.

StopTech Trophy Big Brake Kits

- Ultimate performance race-optimized system for track or street
- Patented Stoptech AeroRotors for optimized airflow
- Patented, billet aluminum AeroHats to further increase airflow
- Weight optimized StopTech STR calipers with patented bolt-in bridge
- StopTech stainless steel brake lines and race engineered caliper brackets
- Hard-anodized finish on calipers and hats that resists fading and discoloration
- Components made in the USA
- Full ISO/TS 16949:2009 certification

StopTech Trophy Kits feature floating, slotted StopTech AeroRotors, stainless steel brake lines, and race engineered caliper brackets, as well as ultra-high performance StopTech STR lightweight forged calipers in six-piston, four-piston or two-piston configurations.

Easily identifiable by their unique shape and finish, StopTech Trophy Big Brake Kit components feature a MIL-spec hard-anodizing on the Trophy STR calipers and AeroHats that is impervious to color change or fading at extreme race temperatures. There are two types of StopTech Trophy Big Brake Kits available - Trophy Race for the track and Trophy Sport for the street.

Any StopTech Brake Kit can be ordered as a Trophy Race or Trophy Sport (street) kit simply by specifying it on your order.

StopTech Performance Sport Kits

- Significant improvements to braking performance
- Pre-matched components for easy kit selection
- Direct replacement performance upgrade rotors for stock wheels
- All components are manufactured to meet or exceed factory specifications
- Available with slotted, drilled or drilled+slotted stoptech sport rotors
- Stainless steel brake lines for better pedal feel
- StopTech street performance brake pads to handle higher temps
- All brackets and hardware to complete the job
- Full ISO/TS 16949:2009 certification

StopTech Performance Sport Kits represent a great performance value by providing significant brake performance improvements using direct-replacement (OEM) sized components that work within factory brake systems.

StopTech Performance Sport Kits are the easiest way for the enthusiast to upgrade their existing rotors, lines and pads for improved braking performance while retaining the existing factory calipers and wheel fitment.

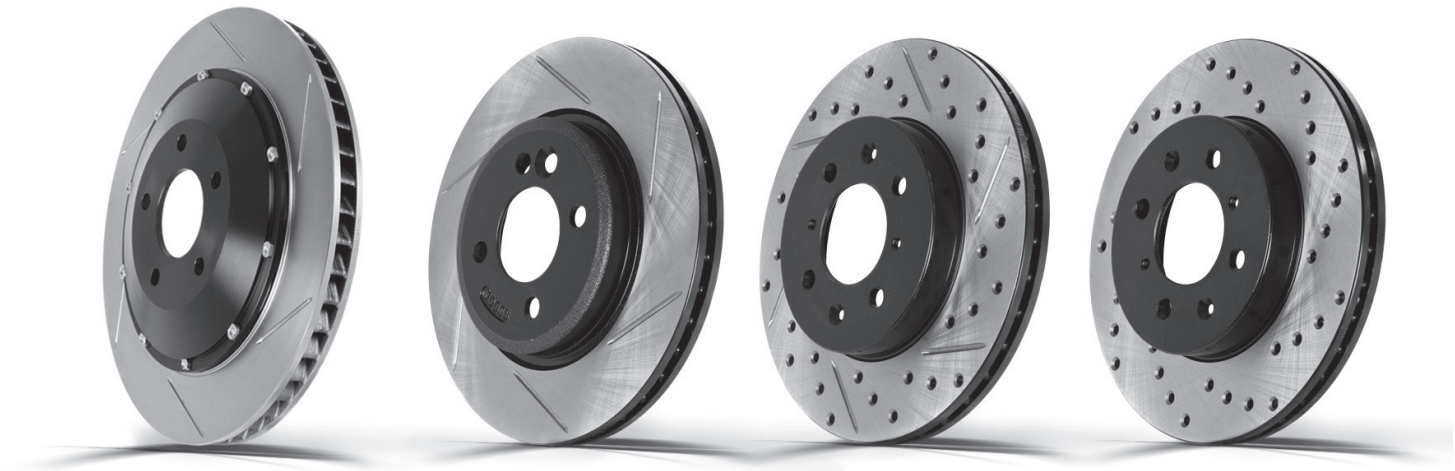

Available as 4-wheel, or front or rear axle kits, the Performance Sport Kits simplify the upgrade process by providing complete, pre-matched systems, without the hassle of mixing and matching individual components.

Performance Sport Kits include 1-piece slotted, drilled or drilled + slotted direct replacement StopTech Sport Rotors that fit your stock factory brake calipers. They offer improved cooling and other advantages not found on competitors' products, like the black e-coating used on all non-friction surfaces for added protection from corrosion.

Coming soon:

- **StopTech Performance Truck Kits** - with slotted StopTech Sport Rotors and Centric Fleet Performance pads
- **StopTech Premium Sport Kits** - with drilled, slotted or drilled+slotted StopTech Sport Rotors and Posi Quiet pads
- **C-Tek Sport Kits** - with drilled+slotted C-Tek Sport Rotors and C-Tek brake pads

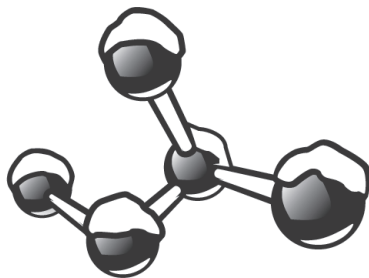

Inquire for more details.

StopTech High Performance Brake Rotors

StopTech offers a number of different brake rotors for a variety of applications. Whether it's for a daily driver, a work vehicle or a race car, all StopTech rotors provide improved cooling, manufacturer equivalent or better specifications and a number of innovative design details that result in the highest quality high performance braking.

- **StopTech BBK AeroRotors** - Larger than stock diameter 2-piece rotors with patented cooling vane design that are 100% made in the USA
- **StopTech AeroRotor Replacement Kits (ARK)** - Direct replacement 2-piece rotors featuring a billet aluminum hat and iron friction ring for increased performance in stock wheel fitments
- **StopTech Sport Rotors** – Direct replacement 1-piece slotted, drilled or drilled+slotted rotors for your factory brake system with improved dissipation of heat, friction material and outgases
- **StopTech Cryo Rotors** - Cryogenically treated rotors for added durability, still offering the same benefits as regular StopTech Sport Rotors

STOPTECH
CRYO LABORATORIES

Centric Parts Premium Brake Rotors

Centric Premium Rotors are blank, 1-piece, direct replacement discs for your factory brake system. They feature Original Equipment specifications and production processes. Centric rotors are manufactured to meet QS and ISO Quality System Standards.

Centric Premium Rotors – Like many StopTech rotors, Centric Premium Rotors offer several key advantages over stock rotors:

- Electrocoating finish that provides long lasting corrosion protection
 - Double disc grinding eliminates run out and allows more effective pad-rotor break in
 - 100% fully machined finishes provide better rotor balance and a more finished look
 - Center-split core castings provide proper heat transfer and thermal efficiency
 - Mill balanced to reduce feedback associated with rotor vibration
- **Centric High Carbon Alloy Rotors** - 1-piece, direct replacement rotors that contain an advanced high carbon alloy metallurgy that greatly reduces the possibility of pad squeal especially with higher friction, European style brake pad compounds

C-Tek Sport Brake Rotors

Replacement brakes for import and domestic vehicles. C-Tek components provide exceptional quality and value.

- **C-Tek Sport Rotors** – Drilled+slotted direct replacement 1-piece rotors that are available separately or as part of C-Tek Sport Kits

Centric Posi Quiet Street Friction

Posi Quiet Semi-Metallic Brake Pads (prefix 104)

- Long-Lasting wear characteristics
- High friction level
- Stable friction performance across wide temperature range

Posi Quiet Ceramic Brake Pads (prefix 105)

- Longest wearing, most advanced material available
- Lowest dust
- Stable friction performance across wide temperature range

Posi Quiet Extended Wear Brake Pads (prefix 106)

- Long wearing
- Low brake rotor wear
- Stable friction performance across wide temperature range, particularly higher temperatures
- Excellent for fleet service and heavy duty applications

Posi Quiet brake pads are manufactured using the same positive molding process utilized by Original Equipment suppliers. Positive molding uses extreme pressure to compress the friction material and bond it to the backing plate. This process assures consistent friction material density throughout the pad, resulting in even wear and performance characteristics throughout the life of the brake pad.

Centric Parts has recognized that the number one cause for customer returns is noise and vibrations. Centric Parts is constantly improving its products to eliminate these issues. Posi Quiet brake friction features either precision cut or shaved backing plates and mechanically attached shims - these small details ensure proper fitment in the caliper and virtually eliminate noise associated with pad vibration.

In addition to these features Centric Parts has added a scorching process to all of its Posi Quiet brake pads. This additional process forces any impurities out of the friction material and pre-burnishes the pads to provide a greatly accelerated the break-in process.

StopTech Street Performance Brake Friction (prefix 309)

- Ideal for high performance street and occasional track day use
- Para-aramid composites provide linear response regardless of pad temperature
- 100% positive molded for uniform friction material density
- Low dust formulation is rotor friendly and leaves wheels cleaner
- Scorched to raise initial cold effectiveness and ease bed-in
- 100% Asbestos-free formulas

StopTech Fleet Performance Brake Friction (prefix 306)

- Ideal for high thermal load work duty vehicles
- Para-aramid composites provides linear response regardless of pad temperature
- 100% positive molded for uniform friction material density.
- Specially engineered for pursuit, rescue and emergency driving.
- Scorched to raise initial cold effectiveness and ease bed-in
- 100% Asbestos-free formulas

StopTech and Centric Parts offer a wide selection of replacement, high performance, work duty and racing brake pads to fit both OEM calipers and StopTech Big Brake Kits. Choosing the correct friction formula for your particular application is essential for optimizing brake system performance and reliability.

Centric's engineering team carefully selects and tests each friction compound to ensure proper stopping performance throughout the lifetime of the brake pad. With three in-house brake dynos and real-time vehicle testing, Centric is the aftermarket leader in brake pads and shoes.

For dedicated race vehicles that are never operated on the street, StopTech is developing its own line of race pad formulations that factor in vehicle type, caliper type, and racing conditions.

Whatever pad you choose, proper bed-in is critical to ensure optimal performance.

StopTech Brake Fluid

- STR-600 for high performance street applications and STR-660 for racing
- DOT 4 motor vehicle brake fluid
- Engineered to optimize brake system performance at high operating temperatures
- Maintains excellent viscosity, lubricity and non-compressibility at racing temperatures
- Special metal container provides up to 25 percent longer shelf life

Available in STR-600 and STR-660 formulations for high performance street and racing applications respectively, StopTech High Performance Brake Fluid is a DOT 4 motor vehicle brake fluid, engineered to optimize brake system performance at high operating temperatures. In addition to guarding against boiling and subsequent loss of efficiency at severe racing temperatures, StopTech Brake Fluid maintains its excellent viscosity, lubricity and non-compressibility.

StopTech High Performance Brake Fluid conforms to and exceeds the current specification of U.S. FMVSS 116 (§ 571.116) DOT 4, is road legal, and compatible with modern ABS and other vehicle dynamic control systems. StopTech brake fluid is mixable with all DOT 3 and 4 products.

StopTech STR-600 High Performance Street Brake Fluid

- Typical Dry Boiling Point: 594°F (312°C)
- Typical Wet Boiling Point: 404°F (206°C)
- Minimum Wet Boiling Point: 383°F (195°C)
- 500mL metal container gives fluid a 25% longer shelf life
- Part Number: 501.00001

StopTech STR-660 Ultra Performance Race Brake Fluid

- Typical Dry Boiling Point: 622°F (328°C)
- Typical Wet Boiling Point: 404°F (206°C)
- Minimum Wet Boiling Point: 383°F (195°C)
- 500mL metal container gives fluid a 25% longer shelf life
- Part Number: 501.00002

StopTech Racing was born to service dedicated race applications. The StopTech Racing division provides the stiffest calipers and best airflow rotors to race teams in several production-based racing series, as well as circle track and off-road competition. StopTech Racing sales and engineering support is unparalleled in the industry, with personalized service available to customize winning race solutions for your needs. Whether it's in SCCA Pro Pirelli World Challenge, Grand-Am, Lucas Oil Off-Road Racing Series, or grassroots circle track, NASA, SCCA, Time Attack and drifting competition, StopTech Racing has something to cover most forms of production-based racing needs.

StopTech Trophy Race Caliper Components and Pads

StopTech Trophy Race calipers have gone through extensive design and testing. Components have been put through corrosion, heat, and brake dyno testing. Caliper bodies have weight optimizing design and manufacturing elements in a hard anodized finish. Use of incorrect components on StopTech caliper may result in damage and/or failure

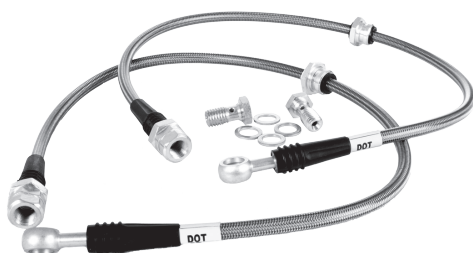

StopTech Racing Brake Pads

- Optimized friction levels for shortest stops
- Engineered for extreme temperatures
- Superb modulation and release characteristics
- Low compressibility for precise pedal actuation
- Excellent pad and rotor life

Titanium Nose Piston Assemblies

- Unique patented design blocks thermal radiation from backing plates
- Castellation reduces contact area, minimizing heat conduction and maximizing convection cooling
- Low-profile design allows for thicker pad volume
- Works with existing StopTech calipers that have dust boot grooves
- Machined piston nose eliminates flex found in stamped titanium shims
- Aluminum piston and titanium nose assembly allows for caliper-matched expansion rates

Stainless Steel Brake Line Kits

- Reduced system compliance for improved pedal feel and responsiveness
- Quicker, firmer, more consistent pedal response
- Allows more precise brake modulation
- Abrasion resistant PVC cover for maximum protection against chaffing
- Precision reinforced end fittings
- All necessary brackets and fasteners

How to Use the StopTech Parts Numbering System

The StopTech Parts numbering system is specifically designed to easily identify both the type of part and, with the exception of friction group products, the type of vehicle the part fits. The StopTech numbers follow this pattern:

XXX . XXXXX

For all product groups, the first three (3) digits (**xxx . xxxxx**) are the part number prefix, which identifies the product group. Please refer to the following page for a complete listing of Brake System Product Groups.

With the exception of friction group products, the next two (2) digits (**xxx . xxxxx**) represent the vehicle make. The final three (3) digits (**xxx . xxxxx**) represent the specific part number.

For Friction Group Products, StopTech references the industry standard FMSI 'D' number for pads in its numbering system. Following the same pattern as above, the first three (3) digits (**xxx . xxxxx**) are the part number prefix which identifies the friction compound. Please refer to the Brake System Product Groups for a complete listing of these compounds. The next four (4) digits (**xxx . xxxxx**) are based on the FMSI 'D' number. The fifth (5) digit (**xxx . xxxxx**) represents a variation in the brake pad design or thickness, or variation of the supplied and/or attached hardware.

Please see the following examples as a general guideline:

126.45071 This part number is identified as a Slotted Brake Rotor (126) for a Mazda (45).

977.33003 This part number is identified as a Sport Brake Kit with Slotted Rotors (977) for a Audi/Volkswagen (33).

309.03940 This part number is identified as a StopTech Street Performance Brake Pad (309) to FMSI D394 (0394) pad shape. Similarly, in the part number 106.09741, the part identifies a Extended Wear Brake Pad for an FMSI D974 pad shape, but with a thickness variation from the 106.09740.

950.34005 This part number is identified as Stainless Steel Brake Line Kit (950) for a BMW (34).

FMSI® and FMS® are registered trade marks of the Frictions Materials Standards Institute, Madison, CT, U.S.A., and the proprietary part numbering system is owned by FMSI.

Stainless Steel Brake Line Part Numbering Notes

It is possible to order StopTech stainless steel brake lines correctly **ONLY** by following the listings in this catalog.

Centric OE replacement brake line part numbers begin with 150. StopTech stainless steel brake line part numbers begin with 950. Nevertheless, it is **NOT** possible to generate a correct part number simply by replacing the 150 prefix (150.xxxxx) with a 950 prefix (950.xxxxx).

Though both are flexible brake hoses and perform basically the same function, 150 and 950 part numbers are **NOT** similar classes of product in the way a 105.06090 brake pad and a 104.06090 brake pad are similar. Just as there is a 120.47024 and a 141.47024, and both are parts for Subaru vehicles, 150 and 950 part numbers must be considered to be completely different types of product. It would only be by coincidence that similar part numbers applied to the same vehicle.

Slotted, Drilled, and Drilled and Slotted Rotors

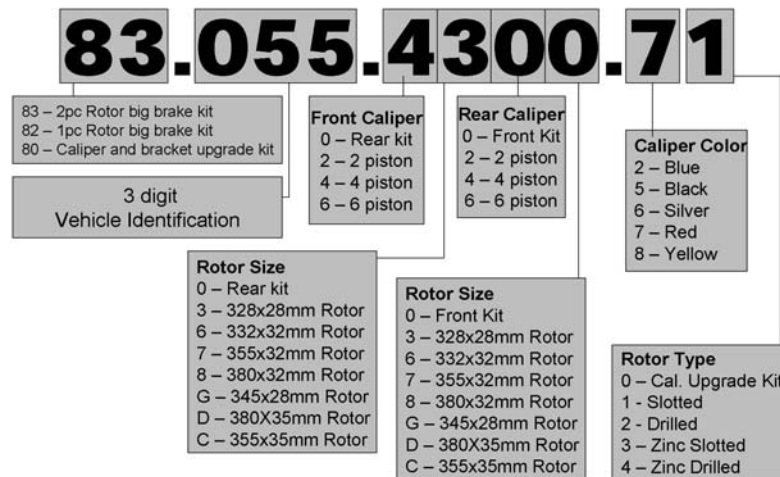

StopTech Sport Rotors are not StopTech AeroRotors. StopTech Sport direct replacement rotors fit stock calipers and have vane designs identical to those of original equipment rotors, with drilling and/or slotting features added. StopTech Sport rotors have a durable black coating on the non-swept areas of the rotor to prevent unsightly corrosion, and meet or exceed original equipment quality specifications. The machining patterns in all StopTech Sport rotors are engineered for maximum rotor integrity, and will provide outstanding service on any street-driven vehicle. However, slotted rotors (126 series) have proven to be the most durable under severe use.

Application Notes

The following key details notes regarding special considerations for specific Stainless Steel Brake Line Kit applications:

- 1 = Front SS Line Kit replaces lower lines only
- 2 = Rear SS Line Kit replaces lower lines only
- 3 = Front SS Line Kit requires modification
- 4 = Rear SS Line Kit requires modification

LIMITED WARRANTY AND LIMITATION OF LIABILITY

By purchasing the STOPTECH brake components described herein and opening the accompanying box or packaging, the purchaser(s), buyer(s) and/or the ultimate user(s) expressly (1) acknowledge that they have read and understood all terms set forth herein; (2) understand and agree that the STOPTECH brake components, whether acquired new or used, whether complete or incomplete, whether saleable or non-saleable, is taken, purchased, selected and/or acquired "AS IS" and "WITH ALL FAULTS"; (3) understand and agree that they bear all risks, including but not limited to the risk as to the quality and performance of said brake components, the risk of any and all liability arising from the use or misuse and/or correct or incorrect installation of said brake kit and/or components, and the risk of bearing the costs of repair or replacement of the subject brake components, whether in defective or non-defective condition. CENTRIC PARTS, d.b.a. "STOPTECH," is not responsible for damage, consequential or otherwise, for equipment failure or mal-performance after installation.

DISCLAIMER OF WARRANTY / LIMITATION OF LIABILITY

The warranty set forth above is in lieu of any other warranty, express or implied, including but not limited to, any implied warranty of merchantability or fitness for a particular purpose.

StopTech will not be liable for any loss, damage, cost or expense, including without limitation any incidental or consequential damages of any kind, including those arising from personal injury, property damage or lost profits, whether based upon breach of warranty or contract, negligence or strict product or other tort liability, arising directly or indirectly in connection with the design, manufacture, sale, use or repair of the products (either separately or in combination with any other product or material) or from any other cause, other than for the cost of replacement of the product as provided in the limited product warranty above. In no event will StopTech, be liable to purchaser for more than the purchase price of the product sold hereunder.

To the extent that any sales person has made any oral statements to the purchaser about the product, such statements are not warranties, should not be relied on by the purchaser, and are not part of the contract of sale. The limited product warranty above is the only warranty provided to purchaser.

BRAKE NOISE

Certain performance brake pad compounds make more noise than others. Proper anti-squeal shims attached to the pads aid in noise reduction. The customer is responsible for any noise problems due to pad selection.

BRAKE ROTOR "WARPING"

The term *warped rotors* is often incorrectly used in reference to steering wheel vibration or judder when the vehicle brakes are applied. The cause of this condition is not a permanent distortion (warping) of the rotor, however, but rather a previous unsuccessful machining of the rotor by a service provider or the non-uniform transfer of adherent pad friction material. Thickness variation, brake pad material buildup and other wear-related conditions that may occur during normal or improper use of the product are expressly excluded from warranty.

CHANGES TO TERMS AND CONDITIONS

STOPTECH reserves the right to change these Terms and Conditions at any time without prior notice, and purchaser's continued purchase of parts constitutes acceptance of those changes. STOPTECH is a trademark of Centric Parts. All other company or brand names mentioned in this catalog are trademarks of CENTRIC PARTS.

DISCLAIMER OF LIABILITY

STOPTECH obtained the information reflected in this catalog from reliable sources and believes this information to be complete and accurate as of the time of printing. STOPTECH does not make any warranty, express or implied, as to the correctness, accuracy, or completeness of the information in this catalog, NOR as to MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE in relation to any of the products described herein. STOPTECH specifically disclaims any responsibility or liability for any errors, omissions, changes, and updates in the information in this catalog and shall not be liable for direct, indirect, incidental, or consequential damages resulting there from. Under no circumstances should replacement parts be used when they do not appear to fit properly, or should the parts be forced to fit or modified in the field in any way. Confirm that you are using the correct replacement part.
