Goodridge G-Stop Application Guide

For over thirty years Goodridge has been involved with motorsport. Having offices and production facilities throughout the United States, Europe and Japan, we have our fingers on the pulse of racing worldwide.

Our primary focus has always been to develop cutting edge technology for all forms of motorsport. Today's top teams in Formula One, CART, IRL, NASCAR and world rally rely on products developed by Goodridge. We are constantly designing and developing new products for all forms of motorsport and streetcar applications, Goodridge G-Stop Brakelines are one of these products.

Goodridge stainless steel braided brake lines have become the standard in professional motorsport where the ultimate in braking is required. There is no room for volumetric expansion, or "mushy brakes" caused by rubber lines. A highly efficient braking system allows you to get deeper into the corner and onto the accelerator faster. Additionally, when G-Stop brake hoses are used with an ABS

braking system they virtually eliminate brake pedal "chatter" and significantly reduce stopping distance.

The advantages of Goodridge G-Stop Brakelines are not only for the high performance vehicles; they are also a terrific performance enhancement and safety improvement on the "daily driver". A reduction in braking distance during a panic stop can reduce the possibility of accidents and save lives. It's features like this that make Goodridge G-Stop Brakelines the most cost-effective safety improvement you can make on any vehicle.

G-Stop brakelines conform to all federal requirements of FMVSS106, making them D.O.T. Certified and T.U.V. Approved (Germany). All Goodridge G-Stop brake lines go through a 9-point Quality Assurance testing process including tensile strength and pressure testing to 3000 p.s.i. before leaving our facility. To ensure proper fit and easy installation, special end fittings and line brackets have been produced to fit identically to each

vehicle. The exclusive Goodridge "Forever Guarantee" covers G-Stop Brakelines, as well as any product we produce.

With the largest application listing of any company and an impeccable reputation backed by champions throughout motorsport there is no reason to choose anyone else.

Please call.. The Goodridge sales team if you require any further assistance.
